

THE ADECCO GROUP

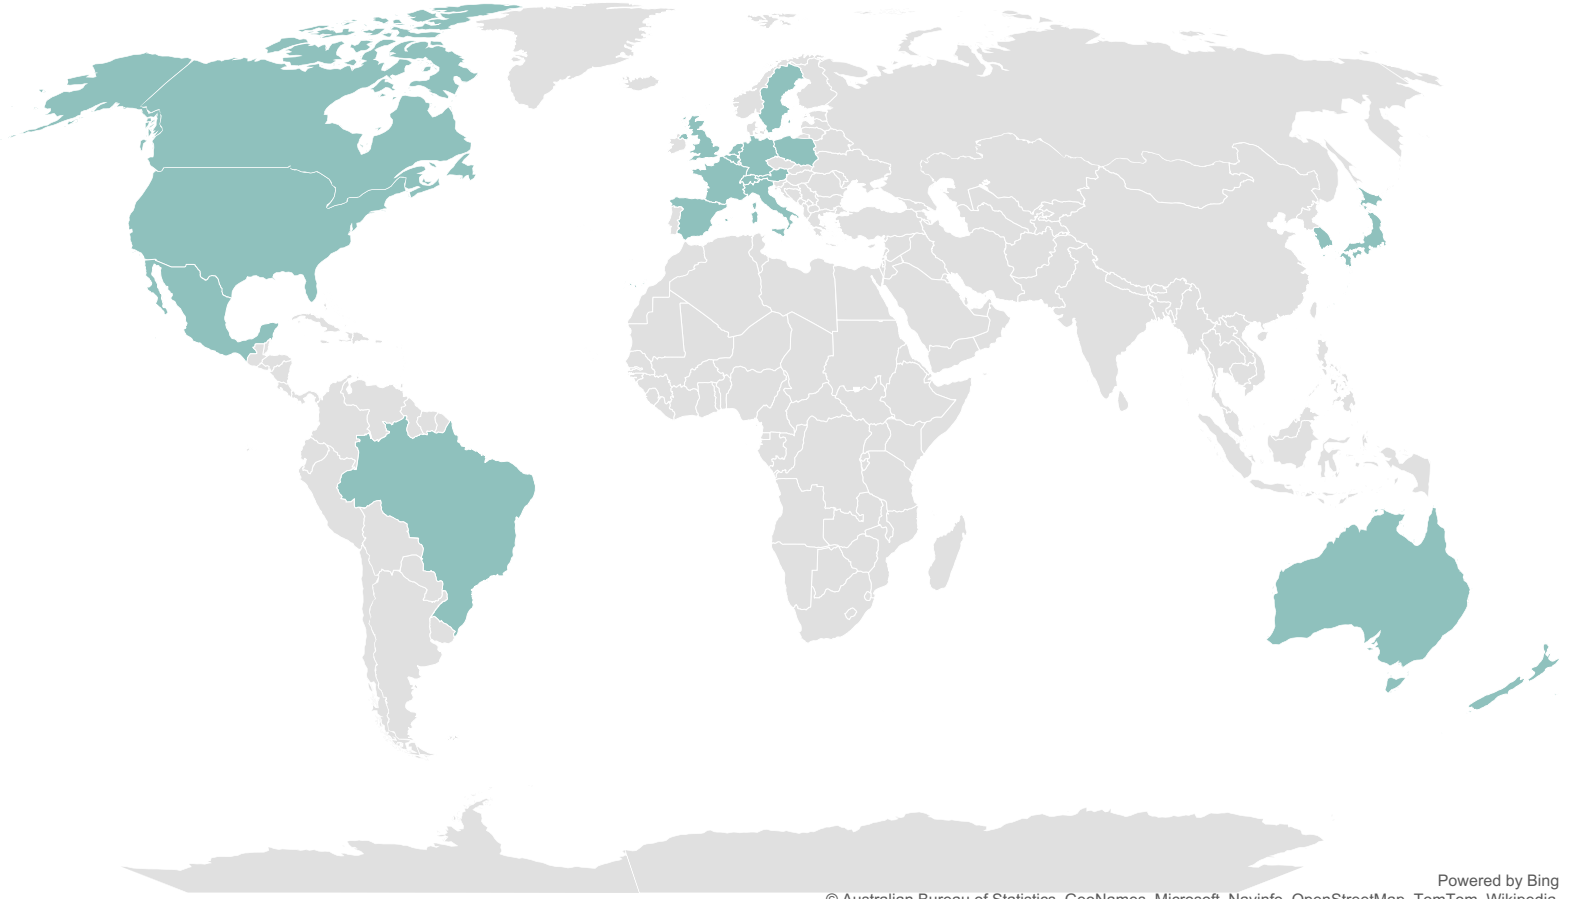

Comparing the outcome of Government Responses to Covid-19

Group Public Affairs

About the study

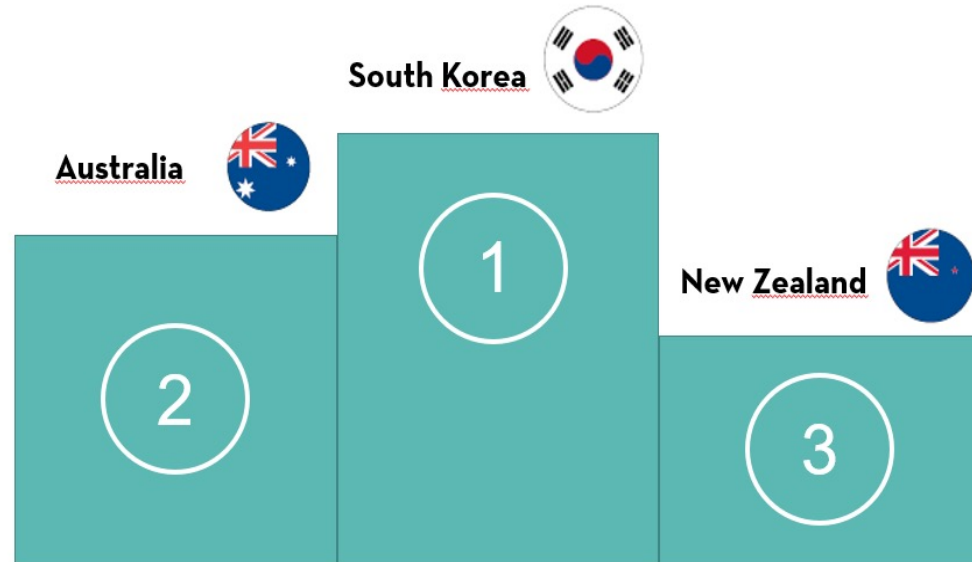

- We compared and ranked 20 countries based on their ability to mitigate the impact of the pandemic, both from an economic and social point of view, and we relate the results to the public policies implemented.
- Two timeframes are considered to establish the rankings:
 - the whole pandemic
 - the recovery phase

Recovery**

Stringency does not mean efficiency

Relationship between the economic rank, the health rank and the stringency index for the whole pandemic

The main findings

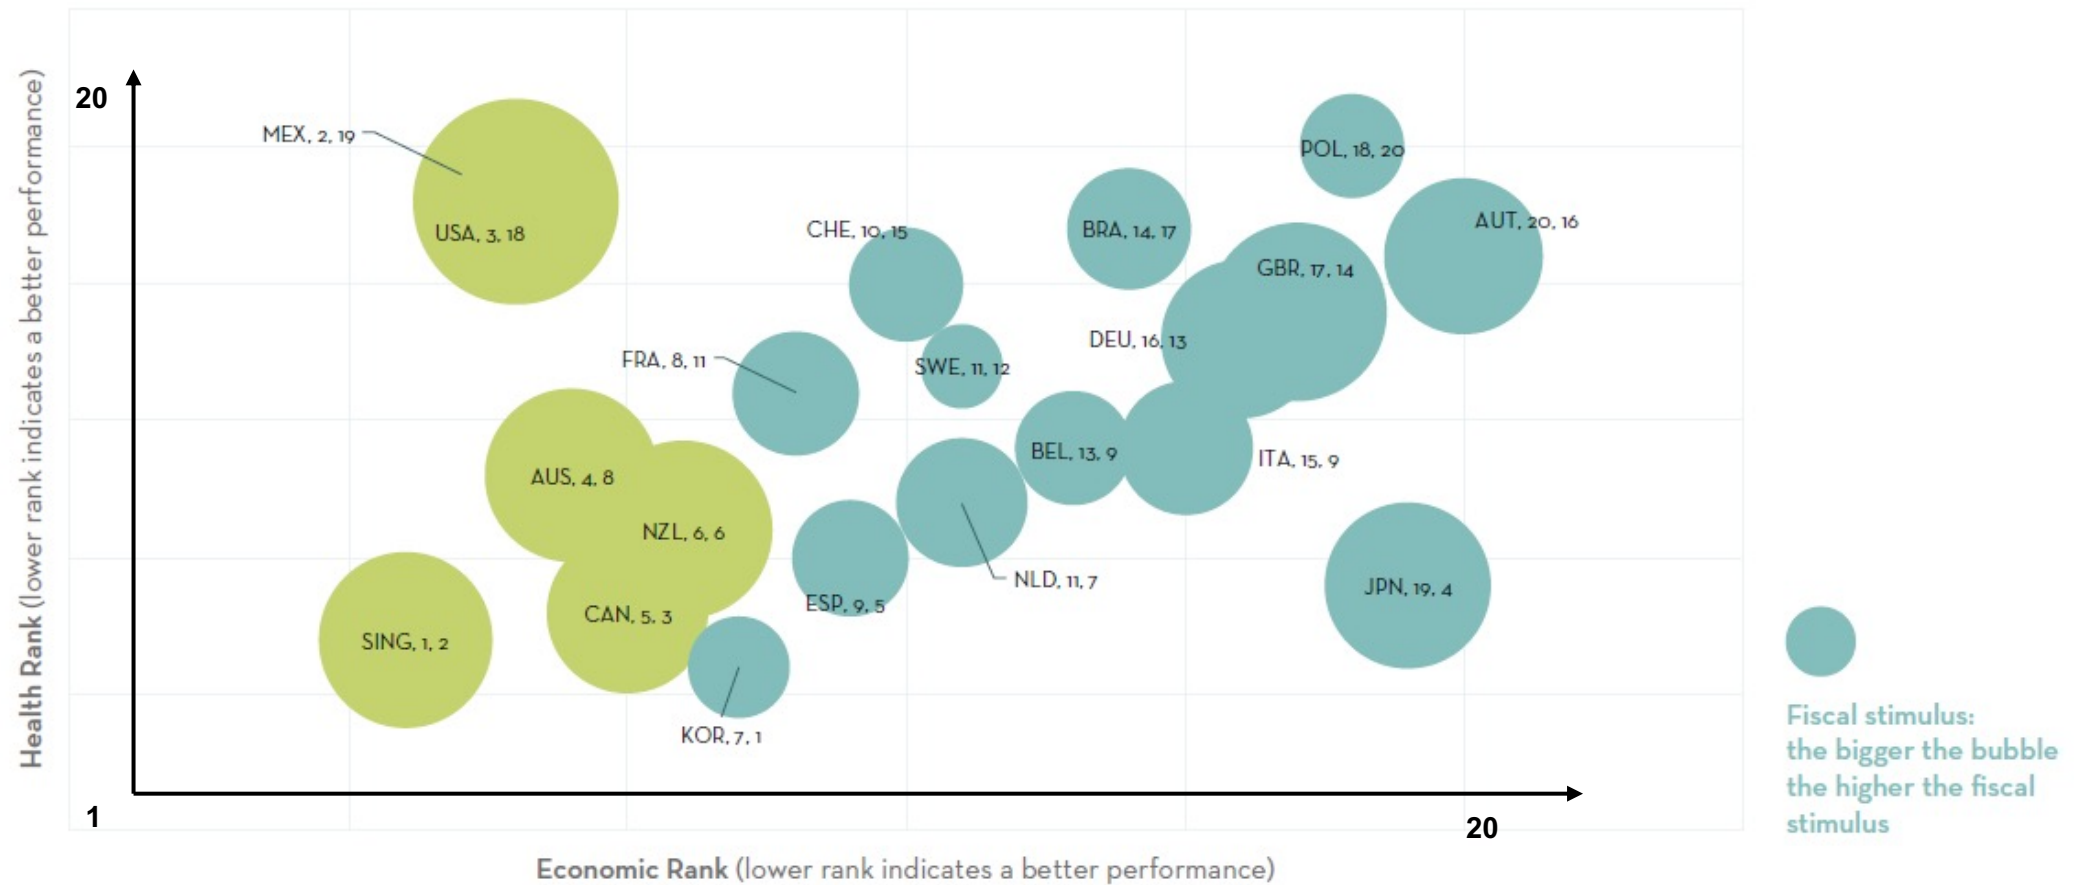

**Saving lives saves
the economy**

**Stringency does not
mean efficiency**

**Support measures
support the
Recovery**

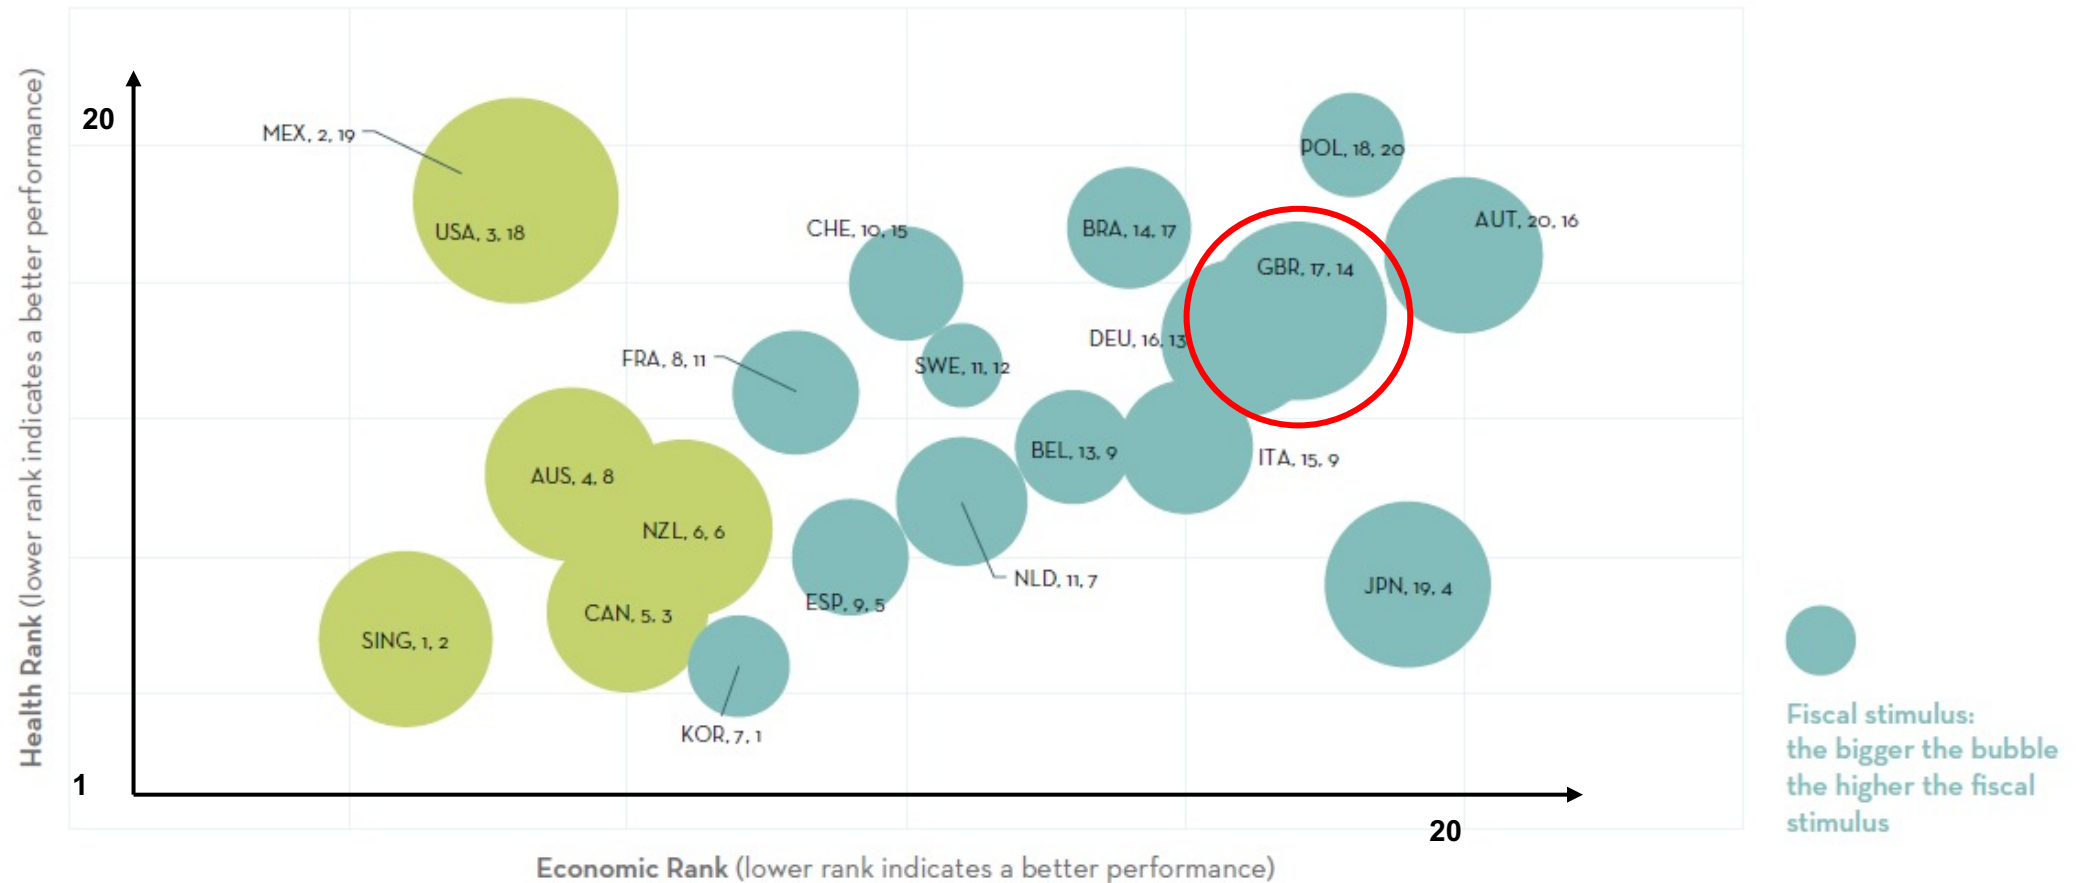

Investing in support measures supports the Recovery

Relationship between economic rank, health rank & fiscal stimulus for recovery

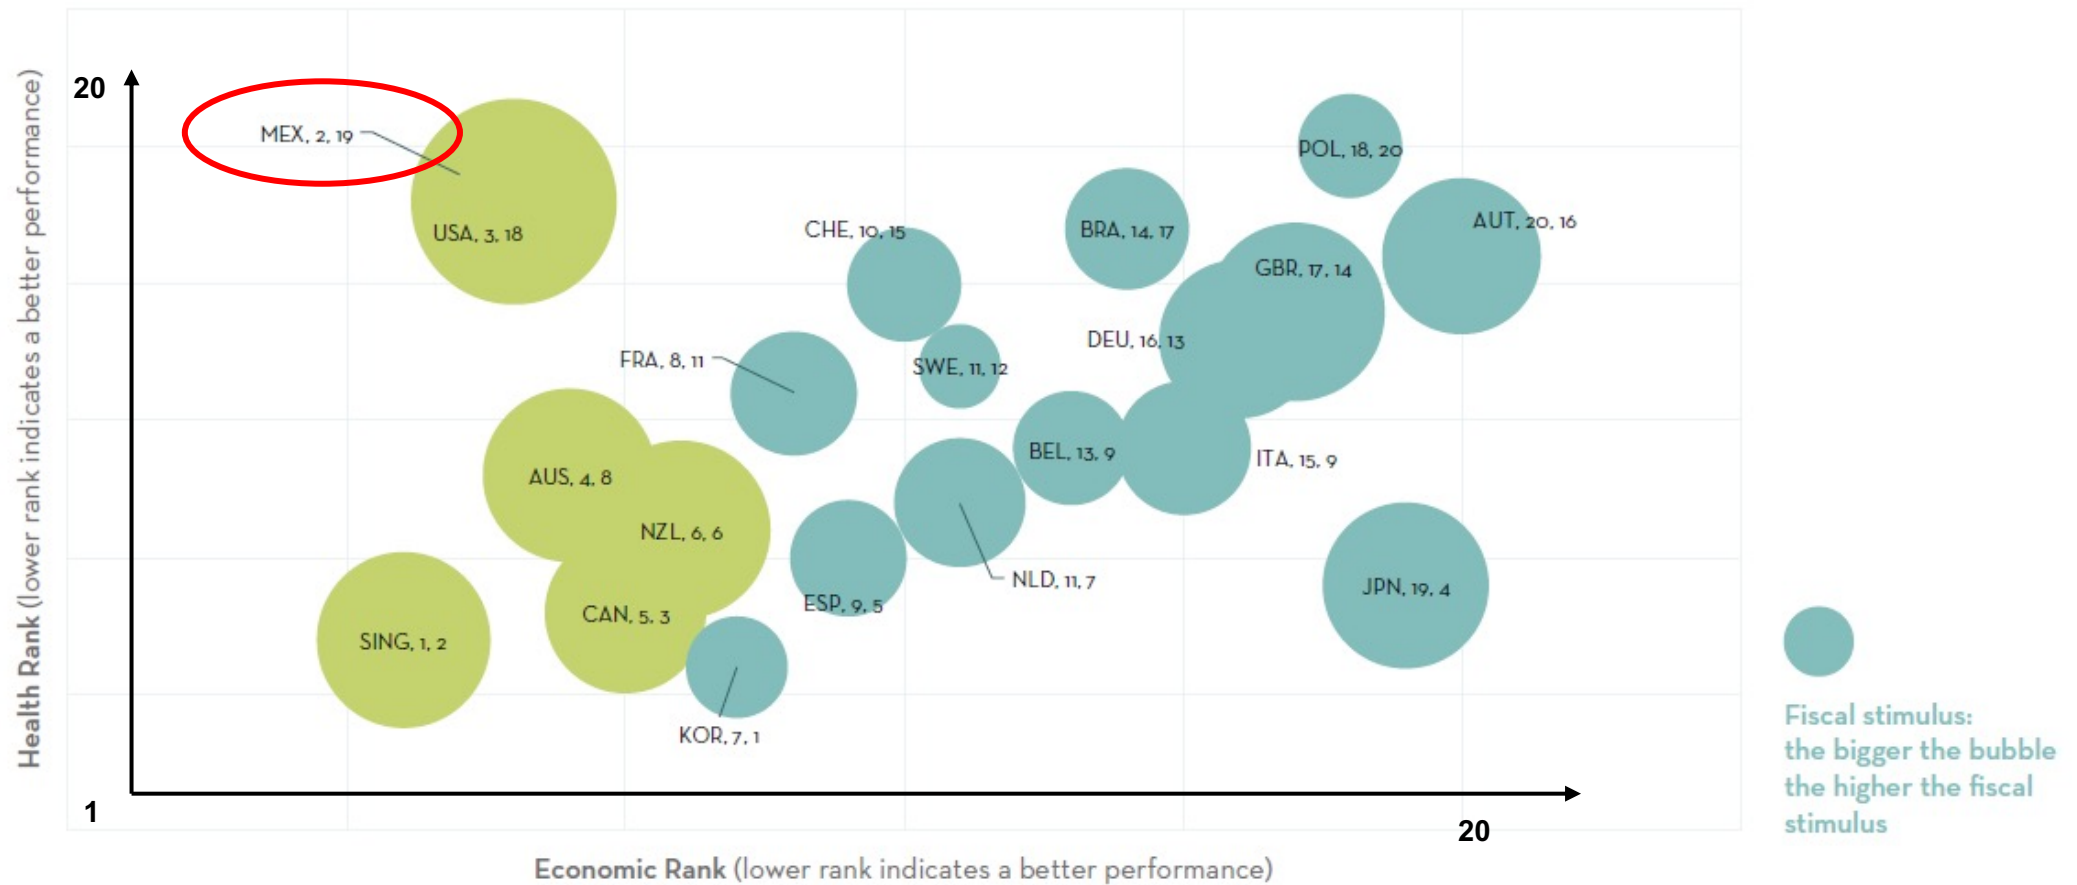

Investing in support measures supports the recovery

Relationship between economic rank, health rank & fiscal stimulus for recovery

Investing in support measures supports the recovery

Relationship between economic rank, health rank & fiscal stimulus for recovery

Policy Recommendations

Protect the people:

protecting lives saves the economy, so government must uphold their vaccination effort to avoid the spread of the virus

Maintain support measures

Targeted measures will continue to be a crucial way of avoiding significant labour market disruption

Leave no one behind

Government should ensure that support measures reach all workers, especially those in diverse forms of work

Never waste a good crisis

Government should leverag the pandemic to encourage companies and jobseekers to invest in career management, re- and upskilling
